CRITERIA FOR ADJUSTING PRECINCT BOUNDARIES

To identify issues pertaining to precinct boundaries and the functional areas which might be impacted by the population, portions, descriptions and number of voting precincts, various factors have been reviewed. These include:

1. Boundary limitations

Legal requirements mandated by various RCW's require that precinct boundaries do not cross congressional, legislative, judicial, county council or municipal boundaries. These limitations might 'force' the creation of some precincts well below the target size.

2. Number of registered voters

The total number of registered voters per precinct shall not exceed the limit of 1,000 as set by the Snohomish County Council in SCC 2.47.

3. Precincts with school district splits

Since school districts are one of the most active districts having elections within the county, precincts with multiple school districts will be kept to an absolute minimum.

4. Growth potential of area

Growth potential is based on factors such as areas being within Urban Growth Areas and land parcel availability. Growth potential will be a factor in determining how close to the target size each precinct should be.

5. Precincts with multiple district splits

Areas with a large number of portions will be reviewed as to the possibility of reducing district splits within precinct boundaries.

6. Discontinuous precinct portions

Due to city annexations, various precincts have developed parts that are no longer contiguous with the main area of that precinct. These "islands" will be studied for possible merger into adjacent precincts.

7. Use of Census Boundary Standards

In all cases of boundary changes, Census Boundary Standards will be used where possible to designate new precinct lines.
