This ordinance makes the following changes in Snohomish County Code section 7.41.030 relating to establishment of fees for special services rendered to persons requesting same at county-operated disposal sites:

Elimination of section 7.41.030(7) which states:

7. The director shall establish fees for special services rendered to persons requesting the same at county operated disposal sites. Nonprofit organizations existing primarily for the purpose of providing necessary support for the poor and infirm may use the services of a solid waste division at one-half the rate established for comparable solid waste disposal services by this title; provided, the director may promulgate rules, requirements and regulations for the receipt of such wastes in a manner which will enhance the efficiency and economy with which they may be received. Other nonprofit organizations, municipal corporations and political subdivisions engaging in public service cleanup activities of limited duration may in the discretion of the director be granted a reduction in disposal rates equivalent to the cost savings which are realized by the solid waste division due to the manner in which such wastes are delivered to a solid waste disposal site and/or equivalent to any other benefit conferred upon the solid waste division.
